

COVID-19 CONTINUES

Rural communities in Nicaragua are still being affected by the ongoing pandemic. Our staff remains completely dedicated to our 177 communities in ensuring that each family and individual has access to healthcare, treatment, and prevention education.

Masks, sanitizers, PPE, and other necessary supplies are being purchased in large bulk quantities, raising our expenses to complete our work. While each item is not expensive, **these costs quickly add up when you are supporting 59,000 people**. Additionally, we are providing food, clothing, and other necessities to more and more families as the effects of the pandemic unfold.

Support our efforts in rural Nicaragua by donating to our Critical Needs fund.
